

ACME TWIN® Sash Balance

The classic ACME TWIN® sash balance that was invented by our Founder. ACME TWIN® balances have been used by high-end sash window manufactures for over 80 years, and are available to replace those that have endured decades of use.

Suitable and preferred by historical and architectural societies, these balances are recognized as the original equipment. ACME TWIN® maintains the original wood, fits the existing mortise, and does not compromise the original "finger-tip touch" since 1927. (Two cables per balance.)

Double Installation; one ACME TWIN® each side

Sash width: no limit. Sash height: no limit.

T4½	4½ lbs. per cable—sash weight of 8 to 9 lbs.
